### INSTALLATION

Coordinate installation with architect / contractor for specific mounting location and height for each mirror application. Check all state and local codes for installation requirements. Transfer mounting points to wall surface for bottom hinge. Drill pilot holes to secure frame to wall with proper fasteners. Hold mirror up and transfer adjustable elbow mounting points to wall. Secure with proper fasteners and adjust elbows to proper extended distance per application. To meet ADA code mirrors bottom reflective edge must be at a height of 40" above the finished floor. Full length mirrors may be used for universal application when installed in correct locations.

Abrasive cleaners & chloric solutions should not be used on mirrors. Dis-coloring or scratching may occur on frame and reflective surface.

\*\*\* ATTENTION \*\*\*

It is the installer's responsibility to make sure the adjustable arm mechanisms are anchored properly and securely, depending on type wall conditions, being that they are the only means of top support. The manufacturer will not be liable or responsible for damages or personal injury due to improper installation.
