SPECIFICATIONS

Corner Guards: Fabricated of #18 gauge stainless steel with a #4 satin finish on all exposed surfaces with a radius on the leading edge at the 90 degree bend. Bends are available other than 90 on request. Standard leg sizes are 3 1/2" (89mm) but are available upon request for other sizes. Max height is 96". Ends of corner guards are bent in and returned to wall and have 1" long mounting legs at each end.

Overall Size: 3 1/2" x 3 1/2" x 48"H (Other heights available upon request)

Screw holes: Advise number of holes required. Standard diameter hole is 1/4"

Ordering Information: When ordering UM20 corner guards, be sure to specify the height and leg size as shown below.

Leg size required: 3 1/2"

Height required: 48"

Your Model Number: UM20-0348

INSTALLATION

Place corner guard plate on door at desired or specified location. Place reference marks at the top two corners, apply adhesive (not supplied) to surface and secure corner guard. Remove protective coating.
