Surface Rust Removal

Please be advised that certain cleaning agents cause surface rusting on stainless steel products. This rust can be safely cleaned using the following procedure:

1. Wash affected accessory with a mild dish detergent and warm water.
2. Dry all surfaces with a towel or soft cloth.
3. Using a dry Scotch Brite pad, polish all surfaces until rust marks are completely removed. **Be sure to polish in the direction of the grain to prevent scratching.** Grab bars may be cleaned using a rotating motion, as the grain is random in these products.
4. Rinse with a damp cloth and dry to the shining original finish

Should you need further information concerning this matter, please contact us and we will be happy to assist you.
